PROJECTS

Picture Finder Hub:

- **Project Link:** [GitHub](#) | [Live](#)
- It is a web application designed to help users find images based on their search queries. Users can type a keyword or phrase into the search bar, and the application will display a gallery of images related to the query. The application leverages an external image API to fetch and display the images dynamically.
- **Technologies** - HTML, CSS, JavaScript with Context APIs.

Personal Portfolio

- **Link:** [GitHub](#) | [Live](#)
- This is a collection of my personal and professional projects, showcasing my skills and experiences in software development, design, and other technical domains.
- **Technologies** - JavaScript, HTML5/CSS3, Git, GitHub.

ACHIEVEMENTS

- Solved **100+** problems on Leetcode ([Profile Link](#)) and GeeksForGeeks ([Profile Link](#))
- **4 Star** on HackerRank ([Profile Link](#))
